JUSTIN THOMAS

QUALITY LEAD — HYBRID RENEWABLE PROJECTS (SOLAR + BESS) | PROJECT QMS, QA/QC & COMMISSIONING

B.Tech Electrical & Electronics Engineering | 11+ years | Open to relocation to Davangere, Karnataka
+91 94466 74610 | justinthomas1992@gmail.com | linkedin.com/in/justinthomass | Hyderabad, India

PROFESSIONAL SUMMARY

Electrical engineer with 11+ years in utility-scale renewable projects, most of it spent owning quality. Has delivered about 1 GWh of battery storage and about 3.9 GW of solar from design review and vendor qualification through FAT, construction QA/QC, commissioning and handover. Has worked hands-on on a 500 MW BESS + solar hybrid (Khavda, Gujarat) and is now leading QA/QC on a 125 MW / 500 MWh LFP BESS covering battery containers, PCS, EMS/SCADA and the 145 kV grid interface.

Has worked on all four sides of an IPP contract: EPC contractor, Owner's Engineer / third-party inspection, IPP / developer and government implementing agency. That means a Project Quality Plan written to satisfy the EPC, OEMs, Owner's Engineer, lenders and authorities at the same time. Builds and runs ISO 9001:2015-aligned project QMS: PQP, QAP, ITP, FQP, NCR/CAPA, audits and handover dossiers. Certified Lean Six Sigma Green Belt. Already knows the Karnataka renewable landscape through the 2,050 MW Pavagada Solar Park.

FIT AGAINST ROLE REQUIREMENTS

- **Hybrid renewables (2 of Solar / Wind / BESS):** Solar + BESS, including a 500 MW BESS + solar hybrid at Khavda and about 3.9 GW solar / about 1 GWh BESS overall.
- **Project QMS & PQP (ISO 9001):** Builds ISO 9001:2015-aligned quality systems: PQP, QAP, ITP, FQP, method statements, calibration matrices.
- **QAP / FQP / vendor document approval:** Has reviewed and approved EPC QAPs, ITPs and FQPs as Owner's Engineer, and drives OEM drawing and document approvals as EPC.
- **Manufacturing QC audits & FAT:** Has run PDI and FAT at OEM works for PV modules, inverters, transformers, switchgear and LFP battery systems.
- **Interface PV / BESS / EMS-SCADA / grid:** Manages the battery, PCS, EMS/SCADA and 145 kV evacuation interfaces on a 500 MWh BESS.
- **NCR, CAPA & audits:** Has issued, tracked and closed NCRs, run RCA/CAPA, and led quality audits for both EPC and Owner's Engineer.
- **Commissioning & acceptance:** Testing and commissioning, punch-list closure and readiness for COD on IPP solar assets.
- **Third-party QC & stakeholders:** Has been the TPI / Owner's Engineer, and is now the EPC-side quality focal point to TCE (Owner's Engineer) and the client.

PROFESSIONAL EXPERIENCE

Manager – Electrical Projects (QA/QC) · Amara Raja Infra Pvt. Ltd.

Aug 2025 – Present

JSW Renew Energy 38 Ltd. — 125 MW / 500 MWh standalone LFP BESS, Kasaragod, Kerala | EPC contractor; Tata Consulting Engineers as Owner's Engineer

- Leads electrical delivery and QA/QC for one of India's largest storage assets under construction: containerised LFP battery systems, PCS, MV/HV balance of plant and the 145 kV evacuation interface.
- Set up the site quality control system end to end: an RFI register (278 entries tracked to closure), NCR and observation management, RCA and CAPA reporting, and post-pour foundation inspection checklists. Keeps the site ready for Owner's Engineer and client audits.
- Quality focal point for OEMs and vendors across Gotion (LFP containers), Hopewind (PCS), Shilchar and Trisquare (transformers, MV panels), CG Power, KEC (cables), Smart Grid (EMS/SCADA) and Fuji Electric (UPS). Covers vendor documentation and drawing approvals, pre-dispatch inspection, site acceptance and defect closure.
- Checks that interfaces between battery, PCS, EMS/SCADA and grid systems match, so integrated testing and commissioning go smoothly.

Owner's Engineer — Quality & Inspection · TQ Cert Services Pvt. Ltd. (Tata Projects Ltd.)

Aug 2023 – Aug 2025

500 MW BESS + solar hybrid, Khavda, Gujarat | 1,034 MW Siyambar / Bandha solar, Jaisalmer, Rajasthan

- Was the owner's technical and quality authority on a utility-scale hybrid BESS + solar project and a 1,034 MW solar programme, overseeing how EPC contractors performed against contract quality requirements.
- Reviewed and approved EPC QAPs, ITPs and field quality procedures. Enforced hold and witness points so stage clearances rested on evidence, not schedule pressure.
- Ran manufacturing QC audits, pre-dispatch inspections and FATs at OEM works for PV modules, inverters, transformers, switchgear and battery systems, stopping non-conforming equipment before it shipped.

- Issued, tracked and closed contractor NCRs. Led quality audits, reviewed designs and drawings, and ruled on deviation and concession requests on technical merit.

Project Lead · **Tata Power Renewable Energy Ltd. (TPREL)** *Aug 2022 – Aug 2023*

450 MWp / 335 MW AC solar, Bikaner, Rajasthan | 300 MW solar, Dholera, Gujarat

- Led IPP-side execution across about 750 MW of utility-scale solar, holding EPC contractors to their quality, schedule and safety commitments under the EPC contracts.
- Controlled construction quality through site reviews, milestone verification and punch-list closure, taking projects through commissioning to commercial operation readiness.
- Resolved interface issues with engineering, procurement, contracts, HSE and O&M on multi-package sites.

Project Engineer — Implementation · **Solar Energy Corporation of India (SECI)** *Oct 2020 – Aug 2022*

2,050 MW Pavagada Solar Park, Tumakuru, Karnataka | 1.4 MWh island BESS, Lakshadweep

- Supported implementation of the 2,050 MW Pavagada Solar Park in Karnataka for the central nodal agency, tracking developers and contractors against scheme milestones.
- Delivered a 1.4 MWh island BESS in Lakshadweep, covering storage integration and commissioning under tight logistics.

Electrical Engineer — Execution & O&M · **KC Kopar Energy Solutions** *Jun 2015 – Oct 2020*

25.4 MW solar, Cochin International Airport Ltd. (CIAL), the world's first fully solar-powered airport

- Installed, tested and commissioned modules, inverters, LT/HT switchgear, transformers and evacuation systems in a live airport.
- Ran plant O&M: preventive and breakdown maintenance, performance monitoring and fault diagnosis. This is where the failure-mode knowledge behind current QA/QC judgement comes from.

PROJECT PORTFOLIO — ~1 GWH BESS | ~3.9 GW SOLAR

Project	Capacity	Location	Role
JSW Renew Energy 38L — LFP BESS	125 MW / 500 MWh	Kasaragod, KL	EPC – QA/QC & Electrical Lead
Khavda BESS + Solar Hybrid	500 MW	Khavda, GJ	Owner's Engineer / TPI
Siyambar / Bandha Solar	1,034 MW	Jaisalmer, RJ	Owner's Engineer / TPI
TP Solapur Solar	450 MWp / 335 MW AC	Bikaner, RJ	IPP / Developer
Dholera Solar	300 MW	Dholera, GJ	IPP / Developer
Pavagada Solar Park	2,050 MW	Tumakuru, KA	Implementing Agency
Lakshadweep Island BESS	1.4 MWh	Lakshadweep	Implementing Agency
CIAL Airport Solar	25.4 MW	Kochi, KL	EPC & O&M

CORE COMPETENCIES

- **Quality Systems:** Project QMS, PQP, ISO 9001:2015, QAP / ITP / FQP, method statements, document control, calibration traceability, handover dossiers and as-builts
- **Inspection & Audit:** Manufacturing QC audits, FAT / PDI, hold and witness points, site audits, NCR / RCA / CAPA, third-party inspection coordination
- **Technical:** LFP BESS, PCS, BMS / EMS / SCADA, PV modules, inverters, trackers, IDTs, HV / MV substations up to 145 kV, protection and earthing; IEC / IEEE standards
- **Commercial & Leadership:** EPC contracts, OEM and vendor management, Owner's Engineer and lender-facing reporting, DPR / MIS, HSE, Lean Six Sigma, team capability building

EDUCATION & CERTIFICATION

- B.Tech (Full-Time), Electrical & Electronics Engineering — SCMS School of Engineering & Technology, Cochin, 2011–2015
- Certified Lean Six Sigma Green Belt (CLSSGB)

PERSONAL DETAILS

Languages: English, Malayalam, Hindi, Tamil | Date of Birth: 30 Dec 1992 | Availability: Immediate | Relocation: Ready to relocate to Davangere, Karnataka
