Subject: Application for Quality Lead (Manager), Hybrid Renewable Project, Davangere

Dear Hiring Manager,

I am applying for the Quality Lead (Manager) role on your utility-scale hybrid renewable project in Davangere. I am an electrical engineer with 11+ years in renewables. Most of that time has been spent owning quality on utility-scale solar and BESS projects, together about 3.9 GW of solar and about 1 GWh of storage. That includes a 500 MW BESS + solar hybrid at Khavda, so I meet your requirement for hybrid experience in at least two of Solar, Wind and BESS.

Your job description asks for one person who can be the quality focal point for EPCs, OEMs, the Owner's Engineer, lenders and authorities. I have worked from each of those positions. As Owner's Engineer for TQ Cert (Tata Projects), I reviewed and approved EPC QAPs, ITPs and FQPs, ran manufacturing QC audits and FATs at OEM works, and issued and closed NCRs on the Khavda hybrid and a 1,034 MW solar programme. At Tata Power Renewables I worked on the IPP side, holding EPC contractors to their contracts through to commissioning and COD readiness on about 750 MW. Today, at Amara Raja Infra, I lead QA/QC for the EPC on a 125 MW / 500 MWh LFP BESS. I built its site quality system from scratch: RFI control (278 items tracked to closure), NCR and CAPA management, and inspection checklists. I also manage vendor quality and interface checks across battery containers, PCS, EMS/SCADA and the 145 kV grid connection.

This background fits the core of your role: writing an ISO 9001-aligned Project Quality Plan, approving QAPs, FQPs and vendor documents, running ITPs on site, keeping PV, BESS, EMS/SCADA and grid systems compatible, and taking the project through commissioning, PAC/FAC/COD and a complete handover dossier. I have also worked as the third-party inspector myself. That lets me set clear, auditable expectations for third-party QC agencies and get the most out of them alongside an in-house quality team.

Karnataka is familiar ground. I supported the 2,050 MW Pavagada Solar Park with SECI, and I am a South India candidate ready to relocate to Davangere. I am available immediately.

I would welcome the chance to discuss how I can build a first-time-right quality system for your project. Thank you for your time and consideration.

Yours sincerely,

Justin Thomas
