JUSTIN THOMAS

Project Leadership – Utility-Scale Solar EPC (International) | ~3.9 GW Solar · ~1 GWh BESS | B.Tech Electrical

Hyderabad, India · **Ready to relocate: KSA, Tunisia, Ivory Coast** | +91 94466 74610 | justinthomas1992@gmail.com | linkedin.com/in/justinthomass | Availability: Immediate

PROFESSIONAL SUMMARY

Electrical engineer and solar EPC project leader with **11+ years** on some of the largest renewable assets in India: the **2,050 MW Pavagada Solar Park**, the **1,034 MW Siyambar/Bandha** programme, a **500 MW solar + BESS hybrid at Khavda** and a **500 MWh standalone BESS**. Cumulative portfolio of **~3.9 GW solar and ~1 GWh storage**, delivered end-to-end from mobilisation, civil, MMS and module works through substations up to 145 kV, grid connectivity, testing, commissioning and handover.

Has worked from **every side of the utility-scale contract**: EPC contractor (Amara Raja Infra), Owner's Engineer/PMC (TQ Cert – Tata Projects), IPP/developer (Tata Power Renewables) and government agency (SECI). That gives a clear read of what the owner, the Owner's Engineer and the grid operator will demand. Has run **GW-scale programmes across several regions at once**, working to IEC/IEEE standards with global OEMs, in remote and logistically difficult locations from the Thar desert to the Kutch salt flats and a Lakshadweep island. Lean Six Sigma Green Belt. Ready to relocate overseas immediately.

CORE COMPETENCIES

- End-to-end solar EPC execution
- Remote-site mobilisation & logistics
- Module installation & DC works
- Grid connectivity & evacuation
- Schedules, milestones & MS Project
- QAP / ITP · NCR / CAPA
- Utility-scale ground-mounted solar
- Civil, piling & foundation QA
- Inverters, IDTs, HT/LT cabling
- Testing, commissioning & COD
- Contractor & subcontractor control
- HSE, risk & desert/monsoon planning
- GW-scale programme oversight
- MMS – fixed-tilt & tracker
- Pooling substations up to 145 kV
- Multi-site, multi-region delivery
- Global OEM & vendor management
- Owner / lender / utility interface

SOLAR PROJECT PORTFOLIO

Project	Type	Capacity	Location	Role / Organisation
Pavagada Solar Park	Utility-scale ground-mounted	2,050 MW	Tumakuru, KA	Implementing Agency – SECI
Siyambar / Bandha Solar	Utility-scale ground-mounted	1,034 MW	Jaisalmer, RJ	Owner's Engineer – TQ Cert (Tata Projects)
Khavda Hybrid	Solar + BESS	500 MW	Khavda, GJ	Owner's Engineer – TQ Cert (Tata Projects)
TP Solapur Solar	Utility-scale ground-mounted	450 MWp / 335 MWac	Bikaner, RJ	Project Lead – Tata Power (TPREL)
Dholera Solar	Utility-scale ground-mounted	300 MW	Dholera, GJ	Project Lead – Tata Power (TPREL)
Cochin International Airport	Captive / C&I: ground-mount, rooftop & canopy	25.4 MW	Kochi, KL	EPC & O&M – KC Kopar Energy
JSW Renew Energy 38L	Standalone LFP BESS	125 MW / 500 MWh	Kasaragod, KL	EPC Contractor – Amara Raja Infra

PROFESSIONAL EXPERIENCE

Manager – Electrical Projects · Amara Raja Infra Pvt. Ltd. (EPC) **Aug 2025 – Present**

125 MW / 500 MWh standalone LFP BESS for JSW Renew Energy, Kasaragod, Kerala — EPC scope; Tata Consulting Engineers as Owner's Engineer.

- Leads electrical execution and QA/QC on the EPC contractor side for one of India's largest storage projects under construction, from battery containers and PCS through MV/HV balance of plant to the **145 kV evacuation interface**.
- Drives vendor and OEM delivery (Gotion, Hopewind, Shilchar, Trisquare, CG Power, KEC, Smart Grid, Fuji Electric): drawing approvals, pre-dispatch inspection, site acceptance and defect closure, matched to the construction schedule.
- Built the site control system: an RFI register (**278 entries tracked to closure**), NCR/RCA/CAPA reporting and post-pour foundation inspection checklists, keeping the site audit-ready for the client and Owner's Engineer.

Owner's Engineer – Quality & Inspection · TQ Cert Services (Tata Projects Ltd.) **Aug 2023 – Aug 2025**

1,034 MW Siyambar / Bandha solar, Jaisalmer, Rajasthan | 500 MW solar + BESS hybrid, Khavda, Gujarat — two states, run in parallel.

- Client's technical and quality authority over **1.5 GW+ of parallel utility-scale construction**, monitoring EPC contractor performance against schedule, quality and contract commitments.
- Approved contractor QAPs, ITPs and field procedures for civil, MMS, module, electrical and substation works; enforced hold and witness points so stages were cleared on evidence, not schedule pressure.
- Carried out pre-dispatch inspection and FAT at OEM works for modules, inverters, transformers and switchgear; issued and closed NCRs, led quality audits and ruled on deviation requests.

Project Lead · Tata Power Renewable Energy Ltd. (Developer) **Aug 2022 – Aug 2023**

450 MWp / 335 MWac solar, Bikaner, Rajasthan | 300 MW solar, Dholera, Gujarat | EV charging operations.

- Led execution of **~750 MW of utility-scale ground-mounted solar across two states at once**, managing EPC contractors against schedule, quality, safety and contract commitments.
- Drove progress through site reviews, milestone verification and punch-list closure, taking packages through testing and commissioning to COD readiness.
- Coordinated engineering, procurement, contracts, HSE and O&M to clear interface issues and keep multi-package sites in sequence; reported progress and risks to management.

Project Engineer – Implementation · Solar Energy Corporation of India (SECI) **Oct 2020 – Aug 2022**

2,050 MW Pavagada Solar Park, Karnataka | 1.4 MWh island BESS, Lakshadweep.

- Monitored developer and contractor delivery against scheme milestones at one of the world's largest solar parks, working with developers, utilities and statutory authorities.
- Delivered a 1.4 MWh island battery storage system under tight logistics, planning material movement and installation sequencing for a remote site.

Electrical Engineer – Execution & O&M · KC Kopar Energy Solutions **Jun 2015 – Oct 2020**

25.4 MW captive solar at Cochin International Airport (CIAL) — the world's first fully solar-powered airport.

- Executed **ground-mount, rooftop and canopy** installations inside a live airport, sequencing work with airport operations so service was never interrupted.
- Installed, tested and commissioned modules, inverters, LT/HT switchgear, transformers, cabling, earthing and evacuation; then ran plant O&M (preventive and breakdown maintenance, fault diagnosis, generation reporting).

TECHNICAL & TOOLS

Solar: c-Si modules, string & central inverters, fixed-tilt & tracker MMS, LT/HT cabling, IDTs, pooling substations, evacuation systems.

HV/MV: power transformers, 145 kV SF_6 breakers, CTs/PTs, 33 kV HT panels, protection, earthing & lightning protection.

Project controls: MS Project, DPR/MIS reporting, MS Excel, AutoCAD, document control.

Standards: ISO 9001:2015, IEC & IEEE, HSE & permit-to-work.

OEMs worked with: Gotion, Hopewind, CG Power, KEC, Shilchar, Fuji Electric and others.

EDUCATION & CERTIFICATION

B.Tech, Electrical & Electronics Engineering (Full-time)
SCMS School of Engineering & Technology, Cochin · 2011–2015

Certified Lean Six Sigma Green Belt (CLSSGB)

PERSONAL

Languages: English, Hindi, Malayalam, Tamil
Date of Birth: 30 December 1992
Availability: Immediate · ready for international relocation (GCC / Africa)
