JUSTIN THOMAS

AGM / DGM – Project Management | Solar EPC (Rooftop & Ground-Mounted) | ~3.9 GW Solar · ~1 GWh BESS

Hyderabad, India (open to Pune & pan-India; 50–60% travel) | +91 94466 74610 | justinthomas1992@gmail.com | linkedin.com/in/justinthomass | Availability: Immediate

PROFESSIONAL SUMMARY

B.Tech (Electrical & Electronics) project leader with **11+ years** executing **rooftop, canopy and ground-mounted solar** and utility-scale BESS projects end-to-end — from planning, engineering and drawing review through procurement interface, civil/MMS/electrical construction, testing, commissioning, grid evacuation and handover. Portfolio of **~3.9 GW solar and ~1 GWh storage** across Kerala, Karnataka, Gujarat and Rajasthan.

Has delivered from **every side of the contract** — EPC contractor (Amara Raja Infra), Owner's Engineer/PMC (TQ Cert – Tata Projects), IPP/developer (Tata Power Renewables) and nodal agency (SECI) — and has run **multiple geographically dispersed sites simultaneously**. Combines schedule and progress control (MS Project, DPR/MIS), contractor and OEM management, and a rigorous QA/QC and HSE regime that clears client and Owner's Engineer review first time. Lean Six Sigma Green Belt.

CORE COMPETENCIES

- Solar EPC end-to-end execution
- Rooftop & ground-mounted solar
- Multi-project / multi-site delivery
- Project scheduling, WBS & milestones
- MS Project · DPR / MIS · dashboards
- Risk & corrective / preventive action
- Civil, MMS, module & DC/AC works
- Inverters, transformers, HT/LT, earthing
- Grid connectivity & evacuation to 145 kV
- Testing, commissioning & handover
- Contractor, vendor & OEM management
- BOQ, drawing & deviation review
- QAP / ITP / FQP · ISO 9001:2015
- NCR, RCA, CAPA & punch-list closure
- HSE, permit-to-work, zero-harm culture
- Client, PMC & utility interface
- Team leadership & capability building
- Lean Six Sigma (Green Belt)

PROJECT PORTFOLIO

Project	Type	Capacity	Location	Role / Organisation
Pavagada Solar Park	Ground-mounted solar park	2,050 MW	Tumakuru, KA	Implementing Agency – SECI
Siyambar / Bandha Solar	Ground-mounted solar	1,034 MW	Jaisalmer, RJ	Owner's Engineer – TQ Cert (Tata Projects)
Khavda Hybrid	BESS + solar	500 MW	Khavda, GJ	Owner's Engineer – TQ Cert (Tata Projects)
TP Solapur Solar	Ground-mounted solar	450 MWp / 335 MWac	Bikaner, RJ	Project Lead – Tata Power (TPREL)
Dholera Solar	Ground-mounted solar	300 MW	Dholera, GJ	Project Lead – Tata Power (TPREL)
JSW Renew Energy 38L	Standalone LFP BESS	125 MW / 500 MWh	Kasaragod, KL	EPC Contractor – Amara Raja Infra
Cochin International Airport	Ground-mount, rooftop & canopy solar	25.4 MW	Kochi, KL	EPC & O&M – KC Kopar Energy
Lakshadweep Island BESS	Island storage	1.4 MWh	Lakshadweep, UT	Implementing Agency – SECI

PROFESSIONAL EXPERIENCE

Manager – Electrical Projects · Amara Raja Infra Pvt. Ltd. (EPC) **Aug 2025 – Present**

125 MW / 500 MWh standalone LFP BESS for JSW Renew Energy, Kasaragod, Kerala — EPC scope; Tata Consulting Engineers as Owner's Engineer.

- Leads electrical execution and QA/QC on one of India's largest storage assets under construction — battery containers, PCS, MV/HV balance of plant and the **145 kV evacuation interface**.
- Drives the procurement/vendor interface with Gotion, Hopewind, Shilchar, Trisquare, CG Power, KEC, Smart Grid and Fuji Electric — drawing approvals, pre-dispatch inspection, site acceptance and defect closure — to keep material flow aligned with the construction schedule.
- Set up the site control system: RFI register (**278 entries tracked to closure**), NCR/observation management, RCA and CAPA reporting and post-pour foundation inspection checklists, keeping the site audit-ready for the client and Owner's Engineer.

Owner's Engineer – Quality & Inspection · TQ Cert Services (Tata Projects Ltd.) **Aug 2023 – Aug 2025**

500 MW BESS + solar hybrid, Khavda, Gujarat | 1,034 MW Siyambar / Bandha solar, Jaisalmer, Rajasthan — two sites in two states run in parallel.

- Acted as the client's technical and quality authority across **1.5 GW+** of simultaneous construction, protecting owner interests on EPC contractor performance, schedule adherence and contractual compliance.
- Reviewed and approved contractor QAPs, ITPs and field quality procedures; enforced hold and witness points so stage clearances were evidence-based rather than schedule-driven.
- Performed pre-dispatch inspection and FAT at OEM works for modules, inverters, transformers, switchgear and battery systems, keeping non-conforming equipment off site and avoiding rework.
- Issued, tracked and closed contractor NCRs; led quality audits; reviewed designs/drawings and adjudicated deviation and concession requests on technical and commercial merit.

Project Lead · Tata Power Renewable Energy Ltd. (Developer / IPP) **Aug 2022 – Aug 2023**

450 MWp / 335 MWac solar, Bikaner, Rajasthan | 300 MW solar, Dholera, Gujarat | EV charging operations.

- Led execution of **~750 MW of ground-mounted solar across two states**, managing EPC contractors against schedule, quality, safety and contractual commitments.
- Tracked progress against milestones through site reviews, milestone verification and punch-list closure, driving packages through commissioning to COD readiness.
- Coordinated engineering, procurement, contracts, HSE and O&M to resolve interface issues and keep multi-package sites in sequence; reported status and risks to management.

Project Engineer – Implementation · Solar Energy Corporation of India (SECI) **Oct 2020 – Aug 2022**

2,050 MW Pavagada Solar Park, Karnataka | 1.4 MWh island BESS, Lakshadweep.

- Monitored developer and contractor delivery against scheme milestones at one of the world's largest solar parks, interfacing with developers, utilities and government stakeholders.
- Delivered a 1.4 MWh island BESS under logistically constrained conditions — material planning, transport and installation sequencing for a remote site.
- Built a tendering, contract and stakeholder perspective that now informs contract-aware execution and claims-sensitive decisions.

Electrical Engineer – Execution & O&M · KC Kopar Energy Solutions **Jun 2015 – Oct 2020**

25.4 MW solar at Cochin International Airport (CIAL) — the world's first fully solar-powered airport.

- Executed **ground-mount, rooftop and canopy** solar installations in a live, security-controlled airport, sequencing work with airport operations to protect uninterrupted service.
- Managed installation, testing and commissioning of modules, inverters, LT/HT switchgear, transformers, cabling, earthing and evacuation infrastructure.
- Ran plant O&M — preventive and breakdown maintenance, performance monitoring, fault diagnosis and generation reporting.

TECHNICAL & TOOLS

Solar: c-Si modules, string & central inverters, fixed-tilt & tracker MMS, LT/HT cabling, IDTs, pooling substations, evacuation.

HV/MV: power transformers, 145 kV SF_6 breakers, CTs/PTs, 33 kV HT panels, protection, earthing & lightning protection.

Project controls: MS Project scheduling & progress monitoring, DPR/MIS reporting, MS Excel & PowerPoint, AutoCAD, document control.

Standards: ISO 9001:2015, IEC & IEEE, HSE & permit-to-work systems.

EDUCATION & CERTIFICATION

B.Tech, Electrical & Electronics Engineering (Full-time)
SCMS School of Engineering & Technology, Cochin · 2011–2015

Certified Lean Six Sigma Green Belt (CLSSGB)

PERSONAL

Languages: English, Malayalam, Hindi, Tamil
Date of Birth: 30 December 1992
Willing to travel extensively across India
