JUSTIN THOMAS

Project Manager – Mission-Critical Electrical Infrastructure | EPC Execution, Testing & Commissioning | HV/MV to 145 kV

Hyderabad, India (open to relocate to Dholera / pan-India) | +91 94466 74610 | justinthomas1992@gmail.com | linkedin.com/in/justinthomass | Availability: Immediate

PROFESSIONAL SUMMARY

B.Tech (Electrical & Electronics) project manager with **11+ years** delivering large EPC energy infrastructure end-to-end — design and drawing review, construction, **testing, commissioning, system validation and handover**. Delivered ~1 GWh of battery storage and ~3.9 GW of solar, including a 300 MW plant at **Dholera, Gujarat**, and a 25.4 MW plant inside a **live, security-controlled international airport**.

Brings deep power-infrastructure expertise of the kind a data centre depends on: **HV/MV substations up to 145 kV**, power and auxiliary transformers, 33 kV HT panels, AC/DC distribution, **UPS and battery banks**, protection and earthing, plus integration of **HVAC, fire detection/suppression and EMS/SCADA** systems in containerised battery plants. Has worked from every side of the contract — EPC contractor, Owner's Engineer/PMC, developer and nodal agency — with strong contractor, vendor, quality and EHS control. Lean Six Sigma Green Belt.

CORE COMPETENCIES

- End-to-end EPC project delivery
- Design, drawing & spec review
- Schedules, resource & execution plans
- HV/MV substations up to 145 kV
- Transformers, HT/LT switchgear, ACDB/DCDB
- UPS, battery banks & critical power
- HVAC & fire-suppression interfaces
- EMS / SCADA integration
- Electrical–civil interface coordination
- Testing, commissioning & validation
- Close-out, handover & O&M transition
- FAT / pre-dispatch inspection
- Contractor & subcontractor management
- Vendor & OEM management
- Variation / deviation review
- QAP / ITP · ISO 9001:2015
- EHS, permit-to-work & site audits
- NCR, RCA & CAPA

SELECTED PROJECTS

Project	Scope relevant to data centres	Capacity	Location	Role / Organisation
JSW Renew Energy 38L BESS	Battery containers, PCS, UPS, HVAC & fire interfaces, EMS/SCADA, 145 kV evacuation	125 MW / 500 MWh	Kasaragod, KL	EPC Contractor – Amara Raja Infra
Khavda Hybrid	BESS + solar, transformers, switchgear, battery systems	500 MW	Khavda, GJ	Owner's Engineer – TQ Cert (Tata Projects)
Siyambar / Bandha Solar	Utility-scale plant, pooling substations	1,034 MW	Jaisalmer, RJ	Owner's Engineer – TQ Cert (Tata Projects)
Dholera Solar	Utility-scale plant, multi-package EPC	300 MW	Dholera, GJ	Project Lead – Tata Power (TPREL)
TP Solapur Solar	Utility-scale plant, multi-package EPC	450 MWp / 335 MWac	Bikaner, RJ	Project Lead – Tata Power (TPREL)
Pavagada Solar Park	Mega-park implementation	2,050 MW	Tumakuru, KA	Implementing Agency – SECI
Cochin International Airport	Live airport: ground, rooftop & canopy, HT/LT, evacuation	25.4 MW	Kochi, KL	EPC & O&M – KC Kopar Energy

PROFESSIONAL EXPERIENCE

Manager – Electrical Projects · Amara Raja Infra Pvt. Ltd. (EPC) **Aug 2025 – Present**

125 MW / 500 MWh standalone LFP BESS for JSW Renew Energy, Kasaragod, Kerala — EPC scope; Tata Consulting Engineers as Owner's Engineer.

- Leads electrical execution and QA/QC on one of India's largest storage assets under construction: containerised battery systems, PCS, MV/HV balance of plant and the **145 kV evacuation interface**.
- Manages the OEM and vendor packages — Gotion (battery), Hopewind (PCS), Shilchar & Trisquare (transformers, MV panels), CG Power, KEC (cables), Smart Grid (EMS/SCADA), Fuji Electric (**UPS**) — from drawing approval and pre-dispatch inspection to site acceptance and defect closure.
- Coordinates the electrical, civil and auxiliary-system interfaces (HVAC, fire detection/suppression, SCADA); set up the site control system with an RFI register (**278 entries tracked to closure**), NCR/RCA/CAPA reporting and post-pour foundation checklists.

Owner's Engineer – Quality & Inspection · TQ Cert Services (Tata Projects Ltd.) **Aug 2023 – Aug 2025**

500 MW BESS + solar hybrid, Khavda, Gujarat | 1,034 MW Siyambar / Bandha solar, Jaisalmer, Rajasthan.

- Acted as the client's technical and quality authority across **1.5 GW+** of parallel construction, protecting owner interests on EPC contractor performance, schedule and contractual obligations.
- Reviewed designs, drawings and specifications; approved contractor QAPs, ITPs and field procedures; enforced hold and witness points; adjudicated deviation and concession requests on technical merit.
- Witnessed FAT and pre-dispatch inspection at OEM works for transformers, switchgear, inverters, modules and battery systems; issued and closed NCRs and led quality audits.

Project Lead · Tata Power Renewable Energy Ltd. (Developer) **Aug 2022 – Aug 2023**

300 MW solar, Dholera, Gujarat | 450 MWp / 335 MWac solar, Bikaner, Rajasthan | EV charging operations.

- Led owner-side execution of **~750 MW across two states, including Dholera**, managing EPC contractors against schedule, quality, safety and contract commitments.
- Ran site reviews, milestone verification and punch-list closure through commissioning to COD readiness; reported progress and risks to management.
- Coordinated engineering, procurement, contracts, HSE and O&M to resolve interface issues and hand assets over smoothly to operations.

Project Engineer – Implementation · Solar Energy Corporation of India (SECI) **Oct 2020 – Aug 2022**

2,050 MW Pavagada Solar Park, Karnataka | 1.4 MWh island BESS, Lakshadweep.

- Monitored developer and contractor delivery against milestones at one of the world's largest solar parks, working with authorities, utilities and developers.
- Delivered a 1.4 MWh island battery storage system under tight logistics, handling material planning and installation sequencing for a remote site.

Electrical Engineer – Execution & O&M · KC Kopar Energy Solutions **Jun 2015 – Oct 2020**

25.4 MW solar at Cochin International Airport (CIAL) — the world's first fully solar-powered airport.

- Executed ground-mount, rooftop and canopy installations inside a **live, security-controlled airport**, sequencing work with airport operations so service was never interrupted.
- Installed, tested and commissioned modules, inverters, LT/HT switchgear, transformers, cabling, earthing and evacuation; then ran plant O&M (preventive and breakdown maintenance, fault diagnosis, performance reporting).

TECHNICAL & TOOLS

Power: power & auxiliary transformers, 145 kV SF_6 breakers, CTs/PTs, 33 kV HT panels, AC/DC distribution boards, UPS & battery banks, protection & earthing.

Systems: BMS/EMS, SCADA, HVAC and fire detection/suppression interfaces, DC cabling architecture.

Project controls: MS Project, DPR/MIS reporting, MS Excel, AutoCAD, document control.

Standards: ISO 9001:2015, IEC & IEEE, EHS & permit-to-work.

EDUCATION & CERTIFICATION

B.Tech, Electrical & Electronics Engineering (Full-time)
SCMS School of Engineering & Technology, Cochin · 2011–2015

Certified Lean Six Sigma Green Belt (CLSSGB)

PERSONAL
