BESS PM COMPETENCIES

- Utility-Scale BESS Project Delivery
- EPC Package & Interface Management
- Project Scheduling & Progress Monitoring
- OEM & Vendor Management
- Contractor & Multi-Agency Coordination
- Client & Owner's Engineer Liaison
- Drawing Approval & Document Control
- Testing, Commissioning & Handover
- Risk, HSE & Monsoon Readiness Planning
- DPR / MIS & Management Reporting
- Team Leadership & Capability Building

BESS TECHNICAL SCOPE

Battery System
Containerised LFP battery systems, BMS, DC cabling & combiner architecture

Power Conversion
PCS, power & auxiliary transformers, 33 kV MV panels

Controls
EMS / SCADA integration, UPS & auxiliary power

Safety Systems
HVAC and fire detection / suppression interfaces

Grid Interface
145 kV evacuation, SF_6 breakers, CT / PT, protection & earthing

TOOLS

MS Project, AutoCAD, MS Office

EDUCATION

B.Tech — Electrical & Electronics Engineering
SCMS School of Engineering & Technology, Cochin · 2011–2015

CERTIFICATION

Certified Lean Six Sigma Green Belt (CLSSGB)

PROFILE

Electrical project manager with 11+ years in utility-scale renewable energy, currently leading electrical project delivery of a **125 MW / 500 MWh standalone LFP BESS** for JSW Renew Energy in Kerala — one of India's largest battery storage assets under construction.

Runs the complete BESS electrical package on the EPC contractor side: containerised battery systems, PCS, MV/HV balance of plant, EMS/SCADA and the 145 kV evacuation interface. Manages seven OEMs and suppliers, the Owner's Engineer and the client from drawing approval through site acceptance and closure. Earlier delivered a 1.4 MWh island BESS in Lakshadweep for SECI under tight logistical constraints.

BESS PROJECT PORTFOLIO

PROJECT	CAPACITY	LOCATION	ROLE
JSW Renew Energy 38L — Standalone LFP BESS	125 MW / 500 MWh	Kasaragod, Kerala	EPC Contractor — Amara Raja Infra
Lakshadweep Island BESS	1.4 MWh	Lakshadweep, UT	Implementing Agency — SECI

BESS PROJECT EXPERIENCE

Manager – Electrical Projects (BESS) — Aug 2025 – Present
Amara Raja Infra Pvt. Ltd. (ARIPL)

> **Project:** JSW Renew Energy Thirty-Eight Ltd. — 125 MW / 500 MWh standalone LFP BESS, Mylatty, Kasaragod, Kerala. EPC contractor scope; Tata Consulting Engineers (TCE) as Owner's Engineer.

- Leads electrical project delivery for a 500 MWh standalone LFP BESS, one of India's largest storage assets under construction, covering containerised battery systems, PCS, MV/HV balance of plant and the 145 kV evacuation interface.
- Owns the OEM and vendor interface across Gotion (LFP battery containers), Hopewind (PCS), Shilchar and Trisquare (transformers, MV panels), CG Power, KEC (power cables), Smart Grid (EMS/SCADA) and Fuji Electric (UPS).
- Drives drawing approvals, site acceptance and defect closure across all electrical packages so equipment supply and installation stay in step with the construction sequence.
- Manages the interfaces between battery, PCS, transformer, MV switchgear, cabling, EMS/SCADA and UPS packages, resolving cross-vendor technical issues before they reach the critical path.
- Acts as the electrical point of contact for the client (JSW) and the Owner's Engineer (TCE), keeping approvals, technical queries and progress reviews moving.

Project Engineer — Implementation — Oct 2020 – Aug 2022
Solar Energy Corporation of India (SECI)

> **Project:** 1.4 MWh island battery energy storage system, Lakshadweep (UT).

- Delivered a 1.4 MWh island BESS installation in Lakshadweep, managing storage system integration under logistically constrained island conditions.
