JUSTIN THOMAS

Site Construction Head – Utility-Scale Renewable Power Projects | Solar · BESS · HV Balance of Plant

Hyderabad, India (open to relocation – Rajasthan / pan-India) | +91 94466 74610 | justinthomas1992@gmail.com | linkedin.com/in/justinthomass

PROFESSIONAL SUMMARY

Renewable-energy construction leader with 11+ years delivering utility-scale power assets – ~3.9 GW of solar and ~1 GWh of battery storage – through site execution, contractor management, QA/QC, EHS, testing, commissioning and handover. Has run civil, mechanical and electrical site packages, multi-contractor balance-of-plant (BOP) works and the 145 kV grid-evacuation interface that every wind farm shares. Brings recent Rajasthan site experience on the 1,034 MW Siyambar / Bandha programme in Jaisalmer district and 450 MWp in Bikaner, and has seen projects from all four sides of the contract – EPC contractor, Owner's Engineer, IPP / developer and government agency – so understands what the client, the Owner's Engineer and the contractor each need to close a milestone. Certified Lean Six Sigma Green Belt; known for building site systems that are safe, auditable and right first time.

CORE COMPETENCIES – MAPPED TO THE ROLE

- **Site Construction Leadership:** civil foundations, mechanical erection and electrical works on multi-package utility-scale sites
- **EHS & Compliance:** zero-incident focus, permit-to-work, HSE governance, monsoon / weather-readiness planning, IEC / IEEE standards
- **Contractor & Vendor Management:** EPC contractors, subcontractors and OEMs; drawing approvals, FAT / PDI, site acceptance, defect closure
- **Schedule & Progress Control:** MS Project scheduling, milestone verification, DPR / MIS reporting, punch-list closure to COD
- **Quality Assurance / Control:** ISO 9001:2015, QAP / ITP, field quality plans, hold & witness points, NCR / RCA / CAPA
- **Grid Connection & BOP:** pooling substations, 33 kV HT panels, power transformers, 145 kV switchyard and evacuation systems
- **Stakeholders & Risk:** client, Owner's Engineer, local authorities and community interface; technical, safety and schedule risk mitigation
- **People:** site team leadership, training and capability building; English, Hindi, Malayalam, Tamil

PROJECT PORTFOLIO – ~3.9 GW SOLAR | ~1 GWH BESS

Project	Capacity	Location	Role
JSW Renew Energy 38L – standalone LFP BESS	125 MW / 500 MWh	Kasaragod, Kerala	EPC Contractor
Khavda BESS + solar hybrid	500 MW	Khavda, Gujarat	Owner's Engineer / TPI
Siyambar / Bandha solar	1,034 MW	Jaisalmer, Rajasthan	Owner's Engineer / TPI
TP Solapur solar	450 MWp / 335 MW AC	Bikaner, Rajasthan	IPP / Developer
Dholera solar	300 MW	Dholera, Gujarat	IPP / Developer
Pavagada Solar Park	2,050 MW	Tumakuru, Karnataka	Implementing Agency
Lakshadweep island BESS	1.4 MWh	Lakshadweep, UT	Implementing Agency
Cochin International Airport solar	25.4 MW	Kochi, Kerala	Execution & O&M

PROFESSIONAL EXPERIENCE

Senior Manager – Electrical Projects | Amara Raja Infra Pvt. Ltd. *Aug 2025 – Present*

JSW Renew Energy 38L – 125 MW / 500 MWh standalone LFP BESS, Kasaragod, Kerala · EPC scope · TCE as Owner's Engineer

- Leads electrical project delivery and site QA/QC for one of India's largest storage assets under construction – containerised battery systems, PCS, MV / HV balance of plant and the 145 kV evacuation interface.
- Coordinates the OEM and vendor interface across Gotion, Hopewind, Shilchar, Trisquare, CG Power, KEC, Smart Grid and Fuji Electric – drawing approvals, pre-dispatch inspection, site acceptance and defect closure.
- Set up the site quality-control regime: RFI register with 278 entries tracked to closure, NCR / observation management, RCA and CAPA reporting, and post-pour foundation inspection checklists for civil works.
- Keeps the site audit-ready for the Owner's Engineer and the client, with work sequenced across civil, mechanical and electrical packages.

Manager – Owner's Engineer, Quality & Inspection | TQ Cert Services (Tata Projects Ltd.) *Aug 2023 – Aug 2025*

500 MW BESS + solar hybrid, Khavda, Gujarat | 1,034 MW Siyambar / Bandha solar, Jaisalmer, Rajasthan

- Served as the client's technical and quality authority, overseeing EPC contractor performance on two of the country's largest renewable programmes, including the Jaisalmer site in western Rajasthan.
- Reviewed and approved contractor QAPs, ITPs and field quality procedures; enforced hold and witness points so stage clearances were evidence-based rather than schedule-driven.
- Carried out FAT / pre-dispatch inspection at OEM works for modules, inverters, transformers, switchgear and battery systems, stopping non-conforming equipment before it reached site.
- Issued, tracked and closed NCRs, led quality audits, reviewed designs and drawings, and decided deviation and concession requests on technical merit.

Project Lead | Tata Power Renewable Energy Ltd. *Aug 2022 – Aug 2023*

450 MWp / 335 MW AC solar, Bikaner, Rajasthan | 300 MW solar, Dholera, Gujarat

- Led developer-side site execution across ~750 MW in two states, holding EPC contractors to schedule, quality and safety commitments on behalf of the asset owner.
- Tracked construction progress through site reviews, milestone verification and punch-list closure, taking contractors through to commissioning and COD readiness.
- Coordinated engineering, procurement, contracts, HSE and O&M to resolve interface issues and keep multi-package sites in sequence.

Project Engineer – Implementation | Solar Energy Corporation of India (SECI) *Oct 2020 – Aug 2022*

2,050 MW Pavagada Solar Park, Karnataka | 1.4 MWh island BESS, Lakshadweep

- Monitored developer and contractor delivery against scheme milestones at one of the world's largest solar parks, on behalf of the central nodal agency.
- Delivered a 1.4 MWh island BESS under logistically constrained conditions, which involved planning material, manpower and equipment around limited access.
- Built the policy, tendering and authority-liaison experience behind contract-aware site decisions.

Electrical Engineer – Execution & O&M | KC Kopar Energy Solutions *Jun 2015 – Oct 2020*

25.4 MW solar at Cochin International Airport (CIAL) – the world's first fully solar-powered airport

- Executed installation, testing and commissioning of modules, inverters, LT / HT switchgear, transformers and evacuation infrastructure in a live, security-controlled airport environment.
- Ran plant O&M – preventive and breakdown maintenance, fault diagnosis and generation reporting – learning the failure modes that now guide construction QA/QC decisions.

EDUCATION & CERTIFICATION

- **B.Tech (Full-Time), Electrical & Electronics Engineering –** SCMS School of Engineering & Technology, Cochin (2011 – 2015)
- **Certified Lean Six Sigma Green Belt (CLSSGB)**
- **Tools:** MS Project, AutoCAD, DPR / MIS reporting
